Why Wool is Exported.

ne crizy in its frantic efforts to vind! ate the delle t breeding farlit passed by the has Democratic Congress. A tow-days since it aclountly declared, that the real incasure of a country's prosperity was to be ganged by its purchases rather er the degree of its prosperity. Now it subtlantly of his to the chipment of a cargo of wool to hagland as affording indisputable evidence of the success of the free wool clause of the existing tariff last It quotes the Weel and Cotton Le ater as follows:

Among the important occurrence noted this week is the shipment of lifty; (housand pounds of American wool to I ignified by one Boston firm and the ext of three hundred thousand pounds tourneau wool by another Boston 1. As certain foolish newspipers will immediately dispute these still ments, we will give upon page 486 the names of the shippers

It sappens, however, that this same strange as it may seem the Wood and Cot to I eponter furnished the explanation Back in October of last year certain free lar boom at which time the Bool and (ol(u Reporter baid

The advance abroad has been more than fully sustained, extreme prices to-ling said by Luglish and Continental belows whose mills are, running full on orders for export and home goussimption. The advance, in fact, has been sufficient to even adrift of domestic woolbeing shipped from the said to Bradford since our own marker has not kept pace with the advances of by a shipment of Montana wool from Boston last week some 100 bales of wool notes have been shipped during the past few days from some 100 bales of wool notis have been shipped during the past few days from New York to France and over 200 bales more are to follow within the next few days, holders here finding that, they are able to sell quickly at a good profit for export. It is simply the workings of the great hexorable haw of supply and demand. There is a surplus of wool here as compared with the present demand, its Europe there is a scarcity, at home the mills are not all well employed; shrond activity exists in nearly every to take center and large quantities of wool are going into consumption, consequently strong values are ruling and there is a better demand in Edgope than in America for all grades of wool.

Here we have the explanation of the

Here we have the explanation of the sprountes to convince the people that it is a sign of American prosperity.
Abroad, thanks to the foolishness of a Democratic Congress, "activity exists in searly every textile centre," and the demand for wool is greater than the home supply. In America, the falls at the time the above article was writted were not "well employed" leaving a surplus of wool even at that date and the situstion is worse to-day than it was then., ip other words the wool that ought to h consumed in our own mills, and was s consumed prior to the destructive effects of a Democratic tariff, glying employment to a full compliment of help at th highest wages ever known in any country, now flods a market abroad only to

munufactufed product.
The situation shows the substantial

come back here again to compute in the

the Herald to the thoughtful attention of the voters who are deformined this fall whether the legislation of this country shall continue to fearer British industries at the expense of our owe, or shall restore that wise system of protection that y epabled the United States to enjoy degree, of prosperity unrqualled la the aorld's history

The Deficiency Tariff.

If anything were needed to add to the law is not a success, that evidence is furnished by a comparison showing the operations of the Gorman law luite first year and a half alongside the McKinley hw in a corresponding period of time This comparison made, from figures, gives the customs receipts, the internal receipts and the total receipts under the Gorman law at less, in its first 18 months, than they were in the first 18 months of the McKinidy Jaw - 2 so hat, even in the threes of its disolution, the Mckinley law in its last 18 months peo-duced more revenue than has the Wilson law in the 18 months it has been in operation. Not only has the Wilson law been inefficient in producing revenue, but it has also reduced the amount of tree importation while greatly increa ing the amount of dutlible imports.

Total receipts, first 18 months Gorman \$455 342 fist Total receipts, inst 8 months McKielev \$492 L21,833
